Eva-Mist Spray Gun

IC Spray is pleased to introduce our new Eva-Mist spray gun, designed to quickly and effectively apply disinfectant without wetting surfaces making the Eva-Mist an important product in protecting against Covid 19.

The spray gun is lightweight at only 390g and with a simple trigger to operate, the Eva-Mist is compatible with all disinfectants and supplied with either a 250 ml quick connect liquid canister or 500 ml screwed liquid canister.

The spraying of disinfectant by mist is proved in terms of swab testing and has an added benefit of using less disinfectant compared to other sprayers.

To operate the Eva-Mist simply connect an air hose to the spray gun, fill the liquid canister and spray, it is as easy as that.

Eva-Mist Spray Gun

The Eva-Mist gun is a quick and easy solution for sanitising and disinfecting surfaces, eliminating the need for drying the surfaces with cloths. Using the Eva-Mist is also more environmental friendly as it reduces the need for using and disposing of antibacterial wipes and cloths.

The Eva-Mist spray produces a dry mist spray which does not wet and is suitable for use on all surfaces including electronics and fabrics.

Features

- Lightweight product
- Consistent operation
- Compatible with disinfectants
- Built for all applications
- Quick & easy to operate
- Does not wet surfaces
- Suitable for all surfaces including electronics & fabrics
